ABSTRACT

This health and safety plan (HASP) establishes the requirements and controls that will be used to eliminate or minimize health and safety hazards associated with personnel conducting routine monitoring activities at Waste Area Group 7 locations inside and outside the fence line of the Radioactive Waste Management Complex (RWMC).

This HASP has been prepared to meet the requirements of the Occupational Safety and Health Administration standard “Hazardous Waste Operations and Emergency Response” (29 CFR 1910.120). This HASP contains the safety and health hazards assessment for conducting all routine monitoring activities and lists controls and mitigative actions to be taken to eliminate or mitigate these hazards.

The intent of this document is to identify known hazards based on previously conducted routine monitoring tasks and to provide a plan for mitigating them. Waste Area Group 7 safety and health professionals supporting these tasks in conjunction with the sampling field team leader conducting these activities must determine the most appropriate hazard control and mitigation measures based on site-specific conditions and should make changes to this document as appropriate.

CONTENTS

ABSTRACT	v
ACRONYMS	xiii
1. INTRODUCTION	1-1
1.1 Purpose	1-1
1.2 Idaho National Engineering and Environmental Laboratory Site Description.....	1-1
1.2.1 Radioactive Waste Management Complex.....	1-2
1.3 Scope	1-2
1.3.1 Site Preparation.....	1-5
1.3.2 Groundwater Monitoring	1-5
1.3.3 Lysimeter and Perched Water Sampling	1-9
1.3.4 Well, Lysimeter, and Tensiometer Maintenance and Abandonment.....	1-9
1.4 Additional Activities.....	1-10
2. KEY SITE PERSONNEL RESPONSIBILITIES	2-1
2.1 Environmental Restoration Program and Project Management	2-1
2.1.1 Environmental Restoration Director.....	2-1
2.1.2 Environmental Restoration Safety, Health, and Quality Assurance Manager.....	2-1
2.1.3 Waste Area Group 7 Manager	2-3
2.1.4 Waste Area Group 7 Project Engineer.....	2-3
2.1.5 Environmental Restoration Long-Term Stewardship Project—Project Manager .	2-4
2.1.6 Integrated Groundwater Monitoring Lead.....	2-4
2.1.7 Long-Term Stewardship Operations Lead.....	2-4
2.1.8 Environmental Compliance	2-5
2.1.9 Quality Engineer.....	2-5
2.2 Task Site Responsibilities.....	2-5
2.2.1 Field Team Leader.....	2-5
2.2.2 Sampling Team.....	2-5
2.2.3 Specialty Subcontractors	2-6
2.2.4 Field Team Members.....	2-6
2.2.5 Nonfield Team Members.....	2-6
2.2.6 Visitors	2-6
2.2.7 Health and Safety Officer	2-7
2.2.8 Industrial Hygienist	2-7
2.2.9 Safety Professional	2-8
2.2.10 Radiological Control Technician.....	2-8
2.2.11 Fire Protection Engineer.....	2-8

2.3	Radioactive Waste Management Complex Responsibilities	2-9
2.3.1	Waste Area Group 7—Radioactive Waste Management Complex Interface.....	2-9
2.3.2	Radioactive Waste Management Complex Site Area Director	2-9
2.3.3	Radioactive Waste Management Complex Work Authorization	2-9
3.	RECORD KEEPING REQUIREMENTS.....	3-1
3.1	Industrial Hygiene and Radiological Monitoring Records	3-1
3.2	Field Team Leader and Sampling Logbooks	3-1
3.3	Site Attendance Record	3-1
3.4	Administrative Record and Document Control Office.....	3-1
4.	PERSONNEL TRAINING	4-1
4.1	General Training.....	4-1
4.2	Project-Specific Training.....	4-1
4.3	Daily Plan-of-the-Day Briefing and Lessons Learned	4-3
5.	OCCUPATIONAL MEDICAL SURVEILLANCE PROGRAM.....	5-1
5.1	Subcontractor Workers.....	5-2
5.2	Injuries on the Site.....	5-2
5.3	Substance-Specific Medical Surveillance.....	5-3
6.	ACCIDENT PREVENTION PROGRAM.....	6-1
6.1	Voluntary Protection Program and Integrated Safety Management.....	6-1
6.2	General Safe-Work Practices.....	6-2
6.3	As Low as Reasonably Achievable Principles	6-4
6.3.1	External Radiation Dose Reduction.....	6-4
6.3.2	Internal Radiation Dose Reduction.....	6-5
6.4	Chemical Contaminant Exposure Avoidance.....	6-5
6.5	The Buddy System.....	6-5
7.	SITE CONTROL AND SECURITY	7-1
7.1	Designated Work Area	7-1
7.2	Controlled Work Area	7-3

7.3	Truck-Traffic Routes	7-3
7.4	Site Security.....	7-3
7.5	Wash Facilities and Designated Eating Areas	7-4
7.6	Designated Smoking Area.....	7-4
8.	HAZARD ASSESSMENT	8-1
8.1	Waste Area Group 7 Routine Monitoring Activities	8-1
8.2	Routes of Exposure.....	8-12
8.3	Environmental and Personnel Monitoring.....	8-12
8.3.1	Industrial Hygiene Monitoring	8-12
8.3.2	Industrial Hygiene Instrument and Equipment Calibration.....	8-13
8.3.3	Exposure Action Limits.....	8-13
8.4	Physical and Environmental Hazard Evaluation, Control, and Monitoring	8-13
8.4.1	Physical Hazards.....	8-13
8.4.2	Environmental Hazards	8-16
8.4.3	Confined Spaces	8-20
8.5	Other Site Hazards and Inspections.....	8-20
9.	PERSONAL PROTECTIVE EQUIPMENT.....	9-1
9.1	Respiratory Protection	9-1
9.2	Personal Protective Equipment Levels	9-3
9.2.1	Level D and Modified Level D Personal Protective Equipment	9-3
9.2.2	Level C Personal Protective Equipment	9-4
9.3	Protective Clothing Upgrading and Downgrading	9-4
9.4	Inspection of Personal Protective Equipment.....	9-5
10.	DECONTAMINATION PROCEDURES	10-1
10.1	Contamination Control and Prevention	10-1
10.2	Equipment and Personnel Decontamination.....	10-1
10.2.1	Equipment Decontamination	10-1
10.2.2	Personnel Decontamination	10-2
10.2.3	Decontamination in Medical Emergencies	10-2
10.3	Doffing Personal Protective Equipment and Decontamination.....	10-2

10.3.1	Modified Level D Personal Protective Equipment Doffing and Decontamination (If Required).....	10-2
10.3.2	Level C Personal Protective Equipment Doffing and Decontamination (If Required)	10-3
10.4	Disposal of Contaminated Personal Protective Equipment and Equipment.....	10-3
10.4.1	Storage and Disposal of Investigative Derived Waste Materials.....	10-3
10.4.2	Site Sanitation and Waste Minimization	10-3
11.	EMERGENCY RESPONSE PLAN	11-1
11.1	Types of Emergency Events	11-2
11.1.1	Events Requiring Emergency Notifications	11-2
11.1.2	Events Requiring Local Project Evacuation or Idaho National Engineering and Environmental Laboratory Emergency Response Organization Response ..	11-2
11.1.3	Events Requiring Total Facility and Project Evacuation.....	11-2
11.2	Emergency Facilities and Equipment	11-3
11.3	Emergency Communications.....	11-4
11.4	Emergency Recognition and Prevention	11-4
11.5	Emergency Response Roles and Responsibilities	11-4
11.5.1	The Idaho National Engineering and Environmental Laboratory and Radioactive Waste Management Complex Emergency Response Organization	11-4
11.5.2	Project Personnel Involved in Emergencies	11-5
11.5.3	Spills.....	11-5
11.5.4	Alarms	11-6
11.5.5	Personnel Accountability and Area Warden.....	11-7
11.5.6	Notifications	11-7
11.5.7	Evacuation Assembly Areas and Central Facilities Area Medical Facility.....	11-8
11.6	Reentry and Recovery	11-8
11.6.1	Reentry	11-8
11.6.2	Recovery.....	11-8
11.7	Critique of Response and Follow up	11-11
11.8	Telephone and Radio Contact Reference List	11-11
12.	REFERENCES	12-1

FIGURES

1-1.	Location of the Radioactive Waste Management Complex at the Idaho National Engineering and Environmental Laboratory.....	1-3
1-2.	Subsurface Disposal Area at the Radioactive Waste Management Complex.....	1-4
1-3.	Location of Radioactive Waste Management Complex groundwater monitoring wells.	1-6
1-4.	Location of Subsurface Disposal Area surficial sediment water sampling suction lysimeters.....	1-7
2-1.	Waste Area Group 7 routine monitoring project organization chart.....	2-2
7-1.	Example configuration for a routine monitoring designated work area.....	7-2
7-2.	Example configuration for a routine monitoring controlled work area.....	7-2
